US-CERT issued an alert to users of Java 7, regarding a security vulnerability issue.

[http://www.computerworld.com/s/artic...use\\_of\\_exploit](http://www.computerworld.com/s/artic...use_of_exploit)

Java is used in Infinite Campus in the Grade Book, Schedule Wizard, and Point-of-Sale. Grade Book (Beta) is not Java-based.

Oracle has released an update to Java to fix this security issue.

<http://www.oracle.com/technetwork/to...2-1896849.html>

It is **STRONGLY** recommended that users take the upgrade to Java 7 Update 11.

While users of Java 4, 5, and 6 were not affected by this security issue, it is recommended that they upgrade to Java 6 Update 38.

**Users can verify which version of Java they have installed here:** <http://www.java.com/en/download/testjava.jsp>

**Once the version has been detected, this page will also provide users with the link to download Java 7 Update 11.** After downloading, please note that a Security Warning pop up will appear, asking for permission to run this application. Users will need to click Run to install.

This security issue affected browser usage of Java, and did not impact server-side Java.
